Subject: Proposed Residential Development North of Gosditch (Dairy Fields)

To whom it may concern

I wish to register my objection to the above proposed development on a much valued greenfield open space, regularly enjoyed by Thames Path hikers, children and dog walkers, myself included. Having just endured more than 12 months immediately adjacent to the recently completed construction of two new houses in High Road, the traffic congestion / noise/ disruption caused has been unbearable. I am strongly of the opinion that only brown field sites should be considered for development.
